International Journal of Mass Spectrometry

Subject index

Ab initio calculations
Ab initio calculations on the isomerization and dissociation of C_4H_5N radical cations, 33
Ab initio MO
Application of In^+ ions in ion attachment mass spectrometry, 15
Absolute cross sections
Absolute electron capture cross sections of Kr^+ with Ne atoms, 77
Acetone
Cation pair formation from acetone following monochromatic soft x-ray absorption, 165
Activation entropy
C_2 binding energy in C_{60}, 1
Angular distributions
Absolute electron capture cross sections of Kr^+ with Ne atoms, 77
Appearance energies
C_2 binding energy in C_{60}, 1

Binding energy
C_2 binding energy in C_{60}, 1
Book review, 135
Breakdown curves
C_2 binding energy in C_{60}, 1

C_{60}
C_2 binding energy in C_{60}, 1
Calibration
''Calibration'' in isotopic measurements, 71
Cation pair formation
Cation pair formation from acetone following monochromatic soft x-ray absorption, 165
Charge-remote fragmentation
Charge-remote fragmentation of fatty acid molecular anions: examination by using resonance electron capture mass spectrometry, 23
C_4H_5N radical cations
Ab initio calculations on the isomerization and dissociation of C_4H_5N radical cations, 33
Chromium speciation
Studies on alkali and alkaline earth chromate by time-of-flight laser microprobe mass spectrometry and Fourier transform ion cyclotron resonance mass spectrometry. Part I: differentiation of chromate compounds, 189
Cluster ions stability
Studies on alkali and alkaline earth chromate by time-of-flight laser microprobe mass spectrometry and Fourier transform ion cyclotron resonance mass spectrometry. Part II: understanding cluster ion formation, 213
Collision-activated dissociation (CAD)
Mass-selective ion accumulation and fragmentation in a linear octopole ion trap external to a Fourier transform ion cyclotron resonance mass spectrometer, 113
Collision-induced dissociation (CID)
Charge-remote fragmentation of fatty acid molecular anions: examination by using resonance electron capture mass spectrometry, 23
Mass-selective ion accumulation and fragmentation in a linear octopole ion trap external to a Fourier transform ion cyclotron resonance mass spectrometer, 113
Competitive ion/molecule reactions
Studies on alkali and alkaline earth chromate by time-of-flight laser microprobe mass spectrometry and Fourier transform ion cyclotron resonance mass spectrometry. Part II: understanding cluster ion formation, 213
Cross contamination
Cross contamination in dual inlet isotope ratio mass spectrometers, 45

DFT calculations
Application of In^+ ions in ion attachment mass spectrometry, 15
C_2 binding energy in C_{60}, 1
Dissociation processes
Ab initio calculations on the isomerization and dissociation of C_4H_5N radical cations, 33

Electron capture
Charge-remote fragmentation of fatty acid molecular anions: examination by using resonance electron capture mass spectrometry, 23
Electron transfer
Absolute electron capture cross sections of Kr^+ with Ne atoms, 77

1387-3806/00/$20.00 © 2000 Elsevier Science B.V. All rights reserved
PII S1387-3806(00)00240-2

Electrospray
Analytical applicability of transition metals and boron anionic complexes formed with iodide, chloride, cyanide, and fluoride in electrospray mass spectrometry, 121
Erratum
Erratum to "Multistep collisionally activated decomposition in an ion trap for the determination of the amino-acid sequence and gas-phase ion chemistry of lithium-coordinated valinomycin" (194:247–259), 133
Evaporation energy
C_2 binding energy in C_{60}, 1
Excited states
Charge-remote fragmentation of fatty acid molecular anions: examination by using resonance electron capture mass spectrometry, 23
Extraction
Schottky barrier governed injection of solvated ions through track membrane interfaced vacuum inlets, 63

Fatty acids
Charge-remote fragmentation of fatty acid molecular anions: examination by using resonance electron capture mass spectrometry, 23
Finite heat bath theory
C_2 binding energy in C_{60}, 1
Fourier transform ion cyclotron resonance (FTICR)
Laser-induced acoustic desorption/chemical ionization in Fourier-transform ion cyclotron resonance mass spectrometry, 173
Mass-selective ion accumulation and fragmentation in a linear octopole ion trap external to a Fourier transform ion cyclotron resonance mass spectrometer, 113
Fourier transform mass spectrometry (FTMS)
Mass-selective ion accumulation and fragmentation in a linear octopole ion trap external to a Fourier transform ion cyclotron resonance mass spectrometer, 113
Fragmentation
Mass-selective ion accumulation and fragmentation in a linear octopole ion trap external to a Fourier transform ion cyclotron resonance mass spectrometer, 113
FTICRMS
Studies on alkali and alkaline earth chromate by time-of-flight laser microprobe mass spectrometry and Fourier transform ion cyclotron resonance mass spectrometry. Part I: differentiation of chromate compounds, 189
Fullerenes
C_2 binding energy in C_{60}, 1

Gas isotope ratio mass spectrometry
Cross contamination in dual inlet isotope ratio mass spectrometers, 45
Gas-phase enantioselectivity
Gas-phase enantioselectivity, 137
Gspann parameter
C_2 binding energy in C_{60}, 1

Hill equation
Opportunities for optimization of the rf signal applied to electrodes of quadrupole mass spectrometers. Part I. General theory, 83

In^+ ion
Application of In^+ ions in ion attachment mass spectrometry, 15
Inner-shell excitation
Cation pair formation from acetone following monochromatic soft x-ray absorption, 165
Inorganic mass spectrometry
Studies on alkali and alkaline earth chromate by time-of-flight laser microprobe mass spectrometry and Fourier transform ion cyclotron resonance mass spectrometry. Part I: differentiation of chromate compounds, 189
Ion attachment mass spectrometry
Application of In^+ ions in ion attachment mass spectrometry, 15
Ion formation processes
Studies on alkali and alkaline earth chromate by time-of-flight laser microprobe mass spectrometry and Fourier transform ion cyclotron resonance mass spectrometry. Part II: understanding cluster ion formation, 213
Ion trap mass spectrometry
Opportunities for optimization of the rf signal applied to electrodes of quadrupole mass spectrometers. Part I. General theory, 83
Opportunities for optimization of the rf signal applied to electrodes of quadrupole mass spectrometers. Part II. EC signals, 97
Isomerization processes
Ab initio calculations on the isomerization and dissociation of C_4H_5N radical cations, 33
Isotope pattern
Analytical applicability of transition metals and boron anionic complexes formed with iodide, chloride, cyanide, and fluoride in electrospray mass spectrometry, 121
Isotopic measurement
"Calibration" in isotopic measurements, 71
Isotopic reference materials
Cross contamination in dual inlet isotope ratio mass spectrometers, 45

Kinetic energy release distributions
C_2 binding energy in C_{60}, 1

Kinetic shifts
C_2 binding energy in C_{60}, 1
Kr^+
Absolute electron capture cross sections of Kr^+ with Ne atoms, 77
Kr^o
Absolute electron capture cross sections of Kr^+ with Ne atoms, 77

Laser ablation/ionization
Studies on alkali and alkaline earth chromate by time-of-flight laser microprobe mass spectrometry and Fourier transform ion cyclotron resonance mass spectrometry. Part II: understanding cluster ion formation, 213
Laser ablation mass spectrometry
Studies on alkali and alkaline earth chromate by time-of-flight laser microprobe mass spectrometry and Fourier transform ion cyclotron resonance mass spectrometry. Part I: differentiation of chromate compounds, 189
Laser desorption
Laser-induced acoustic desorption/chemical ionization in Fourier-transform ion cyclotron resonance mass spectrometry, 173
Laser-induced acoustic desorption (LIAD)
Laser-induced acoustic desorption/chemical ionization in Fourier-transform ion cyclotron resonance mass spectrometry, 173

Mass filter
Mass-selective ion accumulation and fragmentation in a linear octopole ion trap external to a Fourier transform ion cyclotron resonance mass spectrometer, 113
Opportunities for optimization of the rf signal applied to electrodes of quadrupole mass spectrometers. Part I. General theory, 83
Opportunities for optimization of the rf signal applied to electrodes of quadrupole mass spectrometers. Part II. EC signals, 97
Mass spectrometry
Analytical applicability of transition metals and boron anionic complexes formed with iodide, chloride, cyanide, and fluoride in electrospray mass spectrometry, 121
Gas-phase enantioselectivity, 137
Laser-induced acoustic desorption/chemical ionization in Fourier-transform ion cyclotron resonance mass spectrometry, 173
Opportunities for optimization of the rf signal applied to electrodes of quadrupole mass spectrometers. Part I. General theory, 83
Opportunities for optimization of the rf signal applied to electrodes of quadrupole mass spectrometers. Part II. EC signals, 97
Measurement result
"Calibration" in isotopic measurements, 71
Membrane
Schottky barrier governed injection of solvated ions through track membrane interfaced vacuum inlets, 63
Metal speciation
Analytical applicability of transition metals and boron anionic complexes formed with iodide, chloride, cyanide, and fluoride in electrospray mass spectrometry, 121
Metastable fractions
C_2 binding energy in C_{60}, 1
Mixed metal cluster ions
Studies on alkali and alkaline earth chromate by time-of-flight laser microprobe mass spectrometry and Fourier transform ion cyclotron resonance mass spectrometry. Part I: differentiation of chromate compounds, 189
Multichannel
Schottky barrier governed injection of solvated ions through track membrane interfaced vacuum inlets, 63

Noncovalent interactions
Gas-phase enantioselectivity, 137
Normalization
Cross contamination in dual inlet isotope ratio mass spectrometers, 45

Photoion-photoion coincidence
Cation pair formation from acetone following monochromatic soft x-ray absorption, 165
Protein
Mass-selective ion accumulation and fragmentation in a linear octopole ion trap external to a Fourier transform ion cyclotron resonance mass spectrometer, 113
Pulse signal
Opportunities for optimization of the rf signal applied to electrodes of quadrupole mass spectrometers. Part II. EC signals, 97

Radiative decay
C_2 binding energy in C_{60}, 1
Radiolysis
Gas-phase enantioselectivity, 137
Resonance-enhanced multiphoton ionization time-of-flight (REMPI-TOF) spectroscopy
Gas-phase enantioselectivity, 137
RRKM
C_2 binding energy in C_{60}, 1

Stable isotopes
Cross contamination in dual inlet isotope ratio mass spectrometers, 45

Thermionic emission
Application of In^+ ions in ion attachment mass spectrometry, 15
C_2 binding energy in C_{60}, 1
Time-of-flight
Schottky barrier governed injection of solvated ions through track membrane interfaced vacuum inlets, 63
TOFMS laser microprobe
Studies on alkali and alkaline earth chromate by time-of-flight laser microprobe mass spectrometry and Fourier transform ion cyclotron resonance mass spectrometry. Part I: differentiation of chromate compounds, 189
Track-membrane
Schottky barrier governed injection of solvated ions through track membrane interfaced vacuum inlets, 63
Transition state
C_2 binding energy in C_{60}, 1

Uncertainty
"Calibration" in isotopic measurements, 71

Yield ratios
Cation pair formation from acetone following monochromatic soft x-ray absorption, 165
